

Dots Design

NAIL ARCHITECTURE™

1. Prepare natural nail for tip application. Adjust depth of smile line on white tip if desired. Apply tips to nail cut, file and shape. Then clean the nail, apply a small amount of Nail Architectures' Prime Bond to natural nail bed only.

2. Begin by applying small dots of Nail Architectures' Clear Acrylic to the French tip area.

3. Then apply Nail Architectures' Color Acrylic's in Sun Bright, Paradise Blue, and Tangerine Glow, covering the French tip area.

4. Fill in the natural nail bed above the smile line using Nail Architectures' Contemporary Pink Color Acrylic. File and shape entire nail with zebra nail file.

5. Clean nail, then apply one layer of Clear Pro-Tec and cure for 3 minutes.

6. Using Nail Architectures' Designer White, create a 3-D flower and top off with rhinestones in the middle of them.
